

## **SAFE GUARD Heavy Duty Tire Sealant**

**Air Lock Tire Technology**  
Formulated for Off-Road Equipment

### **PERFORMANCE PRODUCTS GUARANTEED**

**SAFE GUARD Heavy Duty** is specifically designed for use in equipment that is used exclusively off-road such as:

- Backhoes
- Cranes
- Skid Loaders
- Tractors
- Log Skidders
- Mowers
- Road Graders

**SAFE GUARD Heavy Duty** is also ideally suited for use in over-the-road vehicles that routinely experience hazardous conditions including:

- Sanitation Trucks
- Concrete Trucks
- Heavy Farm Trucks
- Dump Trucks

Off-road tires must endure heavy punishment. They encounter "tire killers" such as jagged rocks, sharp road concrete, piercing scrap metal, jutting rebar ... to mention a few. The **SAFE GUARD Heavy Duty** formulation withstands the rigors of heavy off-road use, while guarding against bothersome slow leaks and punctures up to .5 inch.

The Heavy Duty formulation begins with the time proven **SAFE GUARD Commercial Grade** product. It is then enhanced with additional fibers and fillers that are larger and more varied in size. The combination of fibers and fillers in **SAFE GUARD Heavy Duty** act to protect against the large and numerous punctures common in off-road equipment. This increased protection translates to lower maintenance costs and, most important, less equipment downtime.
